

# R<sup>3</sup>AP COVID-19 Vaccine Teams

Coordinating On-site Vaccination Clinics at Ohio's Senior Housing Communities

The Ohio Department of Aging, in partnership with key state and local organizations, will offer on-site vaccination clinics at affordable senior housing communities. This approach makes it possible to bring vaccines directly to the homes of tens of thousands older Ohioans. R<sup>3</sup>AP on-site clinics will be executed by:

- Engaging small multidisciplinary teams of experts
- Coordinating support from the Ohio National Guard
- Aligning with Ohio's Emergency Preparedness Regions
- Providing targeted, time-limited support for COVID-19 vaccines

## On-site clinics are convenient, accessible, and equitable

- 1** Mobilizes to vaccinate residential clusters of individuals 65 and older
- 2** Coordinates on-site vaccine education and registration
- 3** Eliminates the need to arrange transportation to an off-site location
- 4** Provides screening for isolation and resources for wrap-around services
- 5** Eases the demand on local vaccine providers by sharing the work
